

## **How to apply**

### **Step 1.**

Complete Service and Device Application. This will allow ATP to screen the applicant for iCanConnect, and other potential funding resources. Consumers are encouraged to list all equipment requests on the Service and Device application, so that ATP can match applicants with as many appropriate funding resources as possible.

### **Step 2.**

If the initial screening process indicates the consumer may be eligible for the iCanConnect program, the consumer will be sent an iCanConnect Application . The consumer may also be asked to submit verification of disability and income at that time.
